

Cepsa presents its sustainable mobility project at the Global Mobility Call

- **Cepsa will participate in three round tables at this leading mobility fair to explain the pillars of its 'Positive Motion' strategy: the development and production of green molecules, the expansion of its electric mobility network, and the transformation of its service stations.**
- **The acting Minister of Transport, Mobility and Urban Agenda, Raquel Sánchez, together with the Minister of Housing, Infrastructure and Transport of the Community of Madrid, Jorge Rodrigo, and the Madrid City Councilor, Reyes Maroto, visited Cepsa's booth on the opening day.**

Cepsa is presenting its sustainable mobility project, included in its 2030 Positive Motion strategy at the Global Mobility Call, one of the most important global trade fairs in the field of mobility, which is being held from October 24 to 26 at IFEMA. The company will participate as one of the leading institutions in energy transformation in an event that will bring together world leaders, business leaders, and other authorities to transmit its current vision and knowledge of the sector.

During the opening day, the acting Minister of Transport, Mobility, and Urban Agenda, Raquel Sánchez, and the Minister of Housing, Infrastructure, and Transport of the Community of Madrid, Jorge Rodrigo, and the Madrid City Councilor, Reyes Maroto, visited Cepsa's booth to learn about all the company's progress in its *Positive Motion* strategy, which encompasses the entire mobility ecosystem.

Similarly, the company will participate tomorrow, October 25, in a presentation to explain its plan for the development of green molecules, which are crucial for the decarbonization of air, maritime, and road transport. In this panel led by Carlos Barrasa, the Commercial & Clean Energies director, the company will stress the need to produce green hydrogen and second-generation biofuels as more than 50% of energy demand, such as for aircraft or large ships, cannot be electrified.

On Thursday, Isabel Gorgoso, New Mobility Director at Cepsa will participate in the "New ecosystems of sustainable mobility" round table where she will explain how the company aims to develop a network of ultra-fast chargers at more than 1,000 service stations by 2030 to become a leader in this segment in Spain and Portugal.

Finally, also on October 26, Pierre-Yves Sachet, Director of Mobility & New Commerce will be present at the "Transforming service stations into spaces of ultra-convenience" roundtable, outlining Cepsa's strategy to transform its network of service stations, the second largest in Spain and Portugal, into digitized spaces that will offer a wide variety of ultra-convenience and food services. They will provide access to a range of fresh food,

PRESS RELEASE

parapharmacy, e-commerce, parcel collection points, and sustainable vehicle washing services, as well as multi-energy solutions for roadside refueling.

Cepsa is a leading international company committed to sustainable mobility and energy with a solid technical experience after more than 90 years of activity. The company also has a world-leading chemicals business with increasingly sustainable operations.

In 2022, Cepsa presented its new strategic plan for 2030, Positive Motion, which projects its ambition to be a leader in sustainable mobility, biofuels, and green hydrogen in Spain and Portugal, and to become a benchmark in the energy transition. The company places customers at the heart of its business and will work with them to help them advance their decarbonization objectives.

ESG criterion inspire all of Cepsa's actions as it advances toward its net positive objective. Over the course of this decade, it will reduce its Scope 1 and 2 CO₂ emissions by 55% and its carbon intensity index by 15-20%, with the goal of achieving net zero emissions by 2050.
